ABOUT US

As Cilicia's Farm Family, which has been integrated with the soil for more than a century, we are a family that owns large lands with our fully automatic banana greenhouse established with modern technology, and the raw material fruit we produce in our own peach, tangerine, orange and lemon orchards, which we carefully cultivate with good agricultural practices.

We provide services to agriculture, our country and farmers with our non-agricultural grain trading, pesticide seed fertilizer trade and ginning factory. With our extensive experience and passionate team, we are dedicated to delivering an excellent taste experience to our customers.

%100 FROM NATURE

“During the production process, we provide our customers with reliable and high quality products by implementing strict quality control procedures. Our products, which are produced using Freeze Dry technology, do not contain any preservatives or additives. We preserve all the natural nutritional values, vitamins, minerals, and antioxidants in our products.

FREEZE DRY TECHNOLOGY

We provide a crispy fruit experience by using only the fruits that we have carefully chosen without compromising quality, without tampering with the fruit's original pure form, and without adding anything to the fruit that isn't already there. We use "Freeze Dry" technology to freeze and dry the fruits we get from our natural and organic sources in order to maintain their flavor and nutritional content.

SUSTAINABLE ENVIRONMENTAL CONSCIOUSNESS

We take active steps to minimize environmental impacts and utilize resources sustainably in our production processes. We continuously make improvements in waste management, energy efficiency, and the use of renewable resources. As the Cilicia's Farm, we are aware of our responsibilities towards humans and nature, and we strive to create a better world for future generations.

QUALITY PRODUCTION FROM PAST TO FUTURE

As the 4th generation of our family in the agricultural sector, we have completed our journey by processing and delivering the valuable crops from ancient Cilicia's lands, which we obtain from farmers, to the end consumer in the purest and highest quality form, while preserving our respect for both producers and consumers. In 2023, we established the Cilicia's Farm Freeze Dry facility with the idea of producing the purest and highest quality products.

GREEN ENERGY

Due to our respect for nature and the earth, we support sustainable agriculture by equipping the entire roof of our Freeze Dry facility with solar panels, thereby contributing to green energy.

HIGH LEVEL OF CUSTOMER SATISFACTION

With our company's central principle of prioritizing customer satisfaction, we work diligently to provide our customers with the best experience and meet their expectations.

HOW IS **FREEZE DRYING** DONE?

1.

Selecting

We harvest top quality raw materials at the peak of their ripeness and nutritional perfection from fertile and fruitful lands of Adana, Turkey.

3.

Freeze-Drying

Ice molecules, inside of the frozen raw materials, turn directly into a water vapour from its solid form without a melting phase and foods get slowly and gently dried over several hours under low temperatures which results in the protection of the cell structure and nutritional values of original products.

2.

Quick Freezing

The fruits are frozen at low temperatures (-40 °C to -80 °C). This process is important to remove the juice.

4.

Packaging

Freeze-dried products are put in moisture resistant packs in our humidity and temperature controlled room to avoid from spoilage due to excess exposure to moisture.

STRAWBERRY

Specifications

Origin	Turkey
Type	Freeze-Dried
Organic	Conventional
Moisture	3% - 4%
